

The HTU Profiled sheet fixing channel: **NOW SELF-ANCHORING**

NEW

available from
June 2019

YOUR BEST CONNECTIONS

All features at a glance:

› **Reliable:** approved by the German building authority (abZ)

› **Simple:** Channel type marked on the top of the channel for quick identification

› **Cost effective:** Reduced storage requirements in comparison to previous HTU

› **Efficient:** simple, fast installation using self-tapping screws due to optimised profile cross-section

› **Easy installation:** no contact with existing reinforcement – cast completely into the concrete cover

Discover the new generation of **HTU PROFILED SHEET FIXING CHANNELS**

The HALFEN HTU Channels are ideal for simple fixing of all types of profiled metal sheets or sandwich panels – using self-tapping screws. Thanks to its innovative shape and profiling, the new, optimized generation of channels are self-anchoring and are cast completely into the concrete cover.

RELIABLE

The ribbed profiling acts like hundreds of tiny anchors. They ensure the resulting loads are reliably transferred into the concrete.

SIMPLE

The type marking on the top of the channel allows quick and easy identification of the channel; even after installation.
