

HALFEN PSA Attachement system for personal fall protection equipment
SECURE ANCHORING AGAINST FALL

All features at a glance:

› CE marking with European Technical Assessment for the HALFEN DEMU T-FIXX[®] Fixing anchor

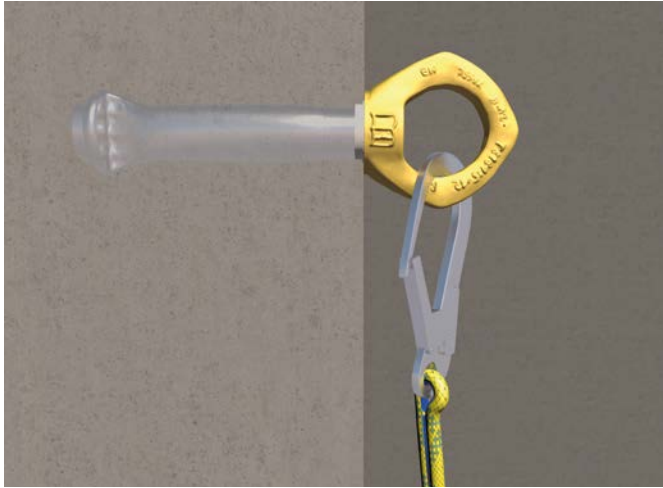

› System suitable for a maximum of two persons

› Economical solution: T-FIXX[®] Anchor cast in concrete with reusable eyebolt

SAFETY WHEN WORKING AT HEIGHTS: HALFEN PSA ATTACHMENT SYSTEM

The reliable solution for attaching personal fall protection equipment

HALFEN PSA Attachment in application: HALFEN DEMU T-FIXX® Fixing anchor cast in concrete with reusable eyebolt for reliable fixing of personal fall protection equipment

The HALFEN PSA serves as attachment point for personal fall protection systems in concrete building components; suitable for use by a maximum of two people.

A T-FIXX® Fixing anchor cast into the concrete is used as a permanent attachment point. A reusable eye-bolt, screwed into the anchor, is required to attach personal fall protection equipment. The suitability of the approved HALFEN DEMU T-FIXX® Fixing anchor was confirmed in a DGUV* test based on CEN/TS 16415 and DIN EN 795. The HALFEN PSA is the ideal solution for construction and maintenance work at heights that require the highest level of safety:

- > lift maintenance work
- > maintenance work on masts and towers
- > maintenance work on solar and wind turbine projects
- > roof projects
- > façade work (projects)
- > façade and window cleaning

* German Institute of Work and Health

For further technical details please see installation instruction.
