› System suitable for a maximum of two persons

› Economical solution: T-FIXX® Anchor cast in concrete with reusable eyebolt

# SAFETY WHEN WORKING AT HEIGHTS: HALFEN PSA ATTACHMENT POINT

## The reliable solution for attaching personal fall protection equipment

HALFEN PSA Attachment in application: DEMU T-FIXX® Fixing anchor cast in concrete with reusable eyebolt for reliable fixing of personal fall protection equipment

The HALFEN PSA serves as an attachment point for personal fall protection systems in concrete building components; suitable for use by a maximum of two people.

A T-FIXX® Fixing anchor cast into the concrete is used as an attachment point. A reusable eye-bolt, screwed into the anchor, is required to attach personal fall protection equipment. The suitability of the approved DEMU T-FIXX® Fixing anchor was confirmed in a DGUV\* test based on CEN/TS 16415. The HALFEN PSA is the ideal solution for construction and maintenance work at heights that require the highest level of safety:

- > lift maintenance work
- > maintenance work on masts and towers
- > maintenance work on solar and wind turbine projects
- > roof projects
- > façade work (projects)
- > façade and window cleaning
