

MERCEDES GARAGE NEWCASTLE

HALFEN·DEHA

YOUR BEST CONNECTIONS

Client:
Rylands Mercedes
Benz

Architect:
Pocklington Steel
Structures

Main Contractor:
Sivils Construction

When asked to design the new showrooms and garage for Rylands Mercedes Benz in Newcastle-Upon-Tyne, Pocklington Steel Structures chose to specify Halfen's Detan tension rod system. With the benefit of being both decorative and functional, Detan fulfilled the brief for this prestigious showroom.

Constructed by Sivils Construction, the showrooms feature two-storey high walls of framed glazing behind which are exposed structural steel columns. The Detan tension rod system

is used to brace the steel columns and provide an architectural feature. Halfen's system was specified for both its performance and excellent delivery schedule - under two weeks from receipt of order!

Easy to install, using simple tools, the Detan tension rod system is readily adjustable in length without the use of turnbuckles or unsightly exposed threads.
